

We have designed a new generation of flights/cleats to complete our wide range of products. The wide base of the profile provides a strong welding on the belt, and the textile reinforced structure provides a very strong mechanical resistance. This type offers new solutions for demanding and abusive applications.

TECHNICAL DATA:

Reinforced cleats 4-ply polyester fabric
Construction material: TPU
Colour: white, blue or black
Height (1): from 30 to 100 mm
Minimum pulley diameter (2): 120 mm
Type: TM.PUR

ADVANTAGES :

Great mechanical resistance.
Conveying of heavy loads
No deformation because of a strong rigidity
EU food conformity for direct food contact

STANDING STOCK :
